

MVKube - Kubernetes Commercial Support

*Unlock the full potential of
K8s in embedded Linux*

SCAN ME

1

Upgradability and Stability for the Long Term

MVKube offers a stable branch supporting existing Kubernetes installations with backported fixes and quality-assured updates. Customers can seamlessly adopt the latest stable releases and updates of the K8s project with commercial-grade support from MontaVista, ensuring reliability for mission-critical deployments.

2

Integrated Baseline and Customization

Customers can start with the integrated and tested baseline of chosen Kubernetes and cluster management components, using the MVKube reference stack above. MVKube allows customizing the reference to meet specific deployment needs, creating unique and optimized Kubernetes solutions.

3

Streamlined Implementation and Management

MVKube simplifies the processes of implementing, managing and optimizing Kubernetes in embedded Linux systems, alleviating the learning curve for project teams. Customers can focus on their core competencies and delivering unparalleled values for their customers!

4

Long-term Customized Support through a SLA

MontaVista has extensive experience in managing diverse K8s configurations and offering customized technical support tailored to specific Linux-based embedded project requirements. Our deeply experienced support team with more than 20 years ensure proven expertise and exceptional service delivery.
